ALLIANCE FIRE ASSURANCE COMPANY OF LONDON.

THE undersigned Agents in Shanghae for the above Company are prepared to accept assurance as under:

On private Dwelling Houses of the best description, *used strictly as such*, and the contents consisting of Household furniture, &c., therein, in private use, at the rate of ¾ *per cent per annum*

On Buildings of Brick or Stone covered with Tiles, Slates or Metal, detached from Chinese Tenements, and on their contents at the rate of *one per cent per annum*, and to the extent of £10,000 on each separate building.

A Building and its contents taken together form one risk. Thus the above sum may be underwritten on a Building alone, or on the contents alone, or part on the Building and part on the contents.

Assurances for Six months will be charged *three-fourths, and for* Three months *one-half of the annual rate.*

No Assurance is to be considered in force until the premium be paid.

Amongst other advantages of the Company, the Assured will be entitled to participate in the Profits after five successive payments.

Parties applying for Assurances will please send *in full particulars of the Risk to be taken*; any deviation from which, without the consent of the Company, will vitiate the Policy.

ADVERTISEMENT.

R. T. PRITCHETT, RIFLE, GUN, AND SWORD MANUFACTURER to Her Majesty's War Department and the Hon. East India Company, begs to call the attention of Officers and Gentlemen abroad to the sound quality and efficiency of the Arms he produces, both for Military purposes and the Sports of the Field. Every GUN sold by R. T. PRITCHETT is manufactured on the premises, and every RIFLE is bored, rifled, and shot under his personal superintendence. For both large or small bore the PRITCHETT BULLET, as adopted by H. M. Government, without cup or plug, is found most serviceable—very numerous testimonials having been received of its range and truth of flight. To the manufacture of SWORDS also, great attention is paid, the most efficient proof of strength and spring being applied, a guarantee given of the quality of the blade, which is uniformly tested by powerful machinery in the presence of the purchaser, before made up.

ALLIED EXPEDITION.

IMPORTANT NEWS.

Another Engagement, and Defeat of San-ko-lin-sin.

CAPTURE OF STAFF OFFICERS AND OTHERS, BY THE TARTARS.

By the *Imperatriz* arrived off Woosung yesterday we received the following important intelligence from the seat of war. It comes from good authority and can be relied on.

The *Imperatriz* left on the 23rd inst.

It appears that on Thursday the 20th, whilst the Allied Force was on its march towards Tang-chau, San-ko-lin-sin made a final effort, with 25,000 men and 80 guns to retrieve his fallen fortunes. His attack was sudden and he completely surrounded the Allies. Mr. Harry Parkes, Mr. Boulby, (the Times Correspondent), Mr. Loch, with others of Lord Elgin's Staff, and Capt. Brabazon, R. A., unfortunately fell into the hands of the Tartars whilst bearing a flag of truce.

San-ko-lin-sin was defeated, with the loss of all his guns, and left 700 killed and wounded on the field, carrying off, however, the prisoners.

Our loss was trifling, and is stated to have been about 40 It is currently reported that San-ko-lin-sin cut his throat in despair.

Sir Hope Grant marched at once into Tang-chau, and gave it up to loot, threatening "that if a hair of one of the prisoner's heads was injured" he would march at once on Pekin, and sack and destroy it.

Tea to the value of a million dollars, was seized in Tang-chau.

NOTHING can look worse than the news we have just received from the North. It would seem that the Chinese are determined to fight it out, and compel us to very strong measures, by acts of gross and unnecessary violence. The seizure of Mr. Parkes and the other unfortunate gentlemen will probably be the beginning of an end such as the mandarins at Pekin never contemplated. It is but fourteen miles from Tangchow to Pekin, and the army have probably ere this marched to the gates of that mysterious city. What will eventually be done heaven only knows.

We think the friends of the unfortunate captives need be under no uneasiness with regard to their eventual release. Mr. Parkes is far too able a man not to get out of this difficulty, he will not fail to represent the vengeance that will fall on such as dare maltreat foreign captives; the prompt measures taken by General Grant will bear him out in what he says with terrible emphasis. Besides which our proximity to the Capital, and their late defeat, will make the Tartars excessively careful not to exasperate the foreigners any further, knowing, as they do, that the foreign commanders have power to put their threat of storming Pekin, and giving it over to loot, into almost instant effect.

There has hitherto been a great division of opinion at home with regard to the policy of this expedition to Pekin, and our mode of treating with the Chinese generally in political matters; let us now hope that this last temporising of the Commissioners, this last engagement with San-ko-lin-sin, and the temporary detention, for we can scarcely believe it will be anything else, of some of our officials captured while bearing a flag of truce, will have at least the effect of putting an end to useless discussions on past diplomacy, and after the many lessons we have had of Chinese cunning and insincerity, of setting up one universal opinion as to the necessity of using strong coercive measures at the very seat of the Imperial Government itself. It has become a matter of absolute necessity that a free channel of communication should be opened between our Ministers and the Court, in order that accounts of matters connected with foreigners and their trade shall no longer reach the Celestial authorities in the form of garbled Chinese despatches, dished up to suit individual interests, but shall be presented by ourselves in their true light to the highest officials of the Empire. When the various officers who have to do with foreigners once find that the truth of matters will be presented to the High Authorities at Pekin we shall hear no more of that petty annoyance and chronic trouble which is at present the order of the day at all the treaty ports, and trade will in consequence be conducted on a far more satisfactory basis them it hitherto has been.

There can be no doubt that this should be the one end in view; meanwhile as time and the season advances, difficulties to no small amount, both practical and theoretical, are increasing, and the Allied Ministers have a task before them, which will require all their talent and energy to bring to a satisfactory completion; for it is now beyond the power of any man to foresee what will be the actual result of the mission, or what effect it will have upon the destinies of the Empire, for such a convulsion as an irruption of foreigners into the city of Peking was never even dreamt of in the philosophy of the Chinese, and is not believed in even now.

We look forward with greater interest than ever to the next step in this eventful campaign.

SOCIETIES, like individuals, always forget something; and it would be well, if there were some sort of institution like Sydney Smith's "screaming gate," at which we might pause, and reflect on what we have omitted and whether our progress is in all respects complete. It is a great problem to make laws which shall work for the future as well as the present,—laws founded on progressive principles, and not mere systems; everything will advance in proportion to the range you give it, and rightly to fix that range is a matter of no small difficulty.

We have noticed with extreme pleasure the proposals lately made, inviting the members of the Shanghai Library to consider the advisability of reducing the hitherto excessive subscriptions to that institution; we believe that on its foundation a large subscription was necessary in order to maintain it, but as the number of the community has in the last few years been steadily increasing, the vitality of any institution like the one in question must be supported by help from within, and not by gratuitous gifts of books or large restrictive subscriptions. Not only is the growth of the Club narrowed and delayed, but a heavy tax is put upon knowledge, and many are debarred from the inestimable charms, which every kind of knowledge always gives.

Let us test by facts the effects of the old system, the present number of subscribers is 91. In 1858 there were 39 new members, in 1859 the number was 21, and from the beginning of this year to the present time 15 only have joined. We have therefore been gradually decreasing, and if we judge of the future by the past, the prospects of our Library are certainly not bright.

There are none but can foresee that this settlement must continue to increase in importance both commercially and politically, and it is obvious that the permanent establishment of a good Library is a great desideratum. The committee hold an important public trust, and the effects of their administration will be felt years after they have lost all connection with the place. We are here dependent in a great degree on the companionship of books for our recreation and amusement. Deprived of all those delightful resources at home which we then esteemed but too lightly our minds naturally seek some other spheres of activity. We dwell, alas! in no Forest of Arden, where we can find "tongues in trees, books in the running brooks, sermons in stones, and good in everything;" our surrounding country is of the tamest and most uninteresting description, requiring an enthusiastic and conscientious valetudinarian ever to visit it even for the purposes of daily exercise—our "brook" is certainly a "running" one, but it is often as nauseous as Sancho Panza's Balsam and as a "book" is hardly more instructive than Martin Tupper's Philosophy,—no share of those "Palaces of Nature" which Childe Harrold sings of are known to us, so that, although our settlement might be described as "a goodly dwelling and a rich" looking to the intellectual development we should feel justified in replying with Master Shallow, "All barren, barren, Sir John."

But books, like letters are always fresh, and not even the distance which divides us from home can destroy their bloom and prevent us from seeking after them with eagerness and pleasure. But some may perhaps be inclined to argue that any great amount of reading is incompatible with the duties of out different vocations, and that duly attending to them, cripples our energies for studies of any severe nature. We venture to observe, with great deference that this is a theory entirely unsupported by experience. The greater exercise we give our minds, the greater grasp we have of all subjects—and although we hardly can hope to obtain any profound acquaintance with literature or science,

"The virtue lies,
In the struggle, not the prize."

We certainly have much time on our hands, and consequently great opportunity,—and "Opportunity has hair in front, behind she is bald; if you seize her by the forelock, you may hold her, but if suffered to escape, not Jupiter himself can catch her again."

The facilities of reading are, we think now open to all, and we heartily congratulate the members that the reform has been made, at the same time, we think much credit is due to those gentlemen on the committee, by whom it has been inaugurated.

THE THIRD ANNUAL MEETING of the North-China Branch of the Royal Asiatic Society was held Tuesday evening, the 25th instant, in the Rooms of the Shanghai Library, the President in the chair.

Dr. James Henderson, Messrs. G. S. Soul, and P. Maclean were elected resident members; and the Rev. S. R. Brown, Kanagawa, corresponding member.

A letter from Dr. Haidinger of Vienna to the President was read. The letter was accompanied by donations of the publications of the Imperial Geological Institute of Austria, and works by himself On meteorites, and other subjects; the letter draws attention to the fall of stoney and metallic masses from the atmosphere in China, and requests that, if possible, specimens of these may be sent to Vienna.

The thanks of the Society were voted to the Austrian Institute, and to Dr. Haidinger, and copies of the Society's Journal are to be sent to them in acknowledgment of their donations.

A paper by R. Alcock, Esq., H. B. M.'s Minister Plenipotentiary to Japan, was then read, On the Grammatical Structure of the Japanese Language.

For this elaborate and valuable Paper the thanks of the Society were voted to Mr. Alcock. This Paper, we believe, is to be published, ere long, as an Introduction to a work on the Japanese language by Mr. Alcock; and we hope to be able to give a further notice of it next week.

The Annual Report of the Council, which was next read, detailed the operations of the Society during the last year—touching on its Foreign Correspondence, the Monthly Meetings, the Society's Journal, its Funds, Library, and so forth.

Several very valuable Books have been added to the Library, especially some volumes on Natural History, from societies in Europe.

Two numbers of the Journal have been carried through the press, during the past year. The last, of these two, vol. II. No. I. pp. 128, is now in the hands of the binder, and will soon be ready for distribution.

The Treasurer's Account showed a balance of Taels 866.7.0 in favor of the Society.

A Report from the Special Committee, appointed by the Council, On the desirableness and feasibility of adding a TRANSLATION DEPARTMENT, for the publication in Chinese of new works under the auspices of the Society, was read and accepted. Notice was given that this subject will be called up, for discussion, at the next regular Monthly Meeting. The design of this Department is to furnish the Chinese with knowledge of modern improvements, in the arts, sciences, &c., &c.

The following is the list of office-bearers elected for the ensuing year:—

President..... T. T. MEADOWS, Esq.
Vice-President .. Rev. JOHN HOBSON.
Treasurer ..... EDWARD WEBB, Esq.
Corresponding Sec. T. HANBURY, Esq.
Recording Sec..... Rev. J. EDKINS.
Directors ..... { Rev. E. C. BRIDGMAN. Rev. E. W. SYLE. W. G. HOWELL, Esq.
Librarian..... B. HOBSON, Esq.

Votes of thanks were now passed unanimously,—

To the Committee of the Shanghai Library, for their obliging use of the Library Rooms for the Monthly Meetings throughout the year;

To Mr. C. S. Compton, for his continued liberality in the arrangements of printing the Society's Journal; and

To the Officers of the Society for the past year.

During the year under review there has been evidently an increasing tendency to oral discussion on practical matters, at the monthly meetings. This is a move in the right direction.

A wish has been repeatedly expressed for *Popular Lectures*, on subjects of general interest, such, for example, as the Chinese Banking System, Book Trade, Postal Service, Horticulture, Literary Examinations, Music, Legerdemain, Locomotives, Navigation, and many others. It is easy to see that very wide and very interesting fields of research are here opened in these and such-like departments, and it is much to be desired that the men, good lecturers, volunteer for this service.

YANG-TA-KE, as Treasurer, has forwarded the annexed memorandum of moneys received and expended in aid of the refugees in this neighbourhood. We have of course no means of vouching for its correctness. It seems strange that the natives, upon whom the care of their own poor legitimately devolved, should have contributed so small a proportion of the fund, and still more strange, that Foreign Merchants should have handed over so large a sum of 7,325 taels to the uncontrolled, unchecked management of Chinese. We honor them for their liberality, we cannot commend them for their prudence.

FIRST ACCOUNT.

The moneys collected from the Foreign Hongs was 7,325 taels. Six Hongs have not yet paid their subscriptions.

Received from Native officers, literati, and gentry, 3,000 strings of cash; about ten families have not paid their subscriptions.

Received in addition from Natives:—

Pillar dollars 100 } = 254 taels, 6 mace, 1 Mexicans ..192 }	candareen, and 6 li.	

Issued to Fa yuen Tang, 13342 strings of cash.
For purchase of Sha yan medicine, 70 strings.
Given to Mr. Hobson for destitutes, 170 dollars.
London Mission, for do. 40 do.
Still in the chest, 878 tls. 5 m. 8 c. 2 li.
The small accounts for the distribution have not yet come in, but will before long.

SECOND ACCOUNT.

Account of moneys received for the Nanmings The names of the nobility, gentry, and literati, who have subscribed:—

Hsüeh, Act. Gov. Gen...	500 strings.	
H. E. the Tootai	2,200 „	
The Shanghai Hsien	600 „	
Fung tse Shan	649 „	333 cash.
Yin sou kuan	400 „	
Wu Lan chuen	140 „	
Yea yin tao.....	110 „	
Ta nao hsuen	100 „	
Sin yuen chan	70 „	
Yin ming shih.....	60 „	
Chuen shan poo	48 „	
Hsun hsin tang	40 „	
Ma chiu cheang	30 „	
Ching yü tien	20 „	
Smaller amounts.....	70 „	700 cash.
Collected in the Northern Districts.....	13,900 „	42 „
	19,000 strings	33 cash.

Provisions, &c. received:—

Teai hae tang—meal	20 tun.
Yin ming shih—white & red beans	40 „
Ton poo tang—sha yan, medicines	1,88 ¹ pao.
Chiang chen shan—medicated tea	1 chest.
Ming li foreign hong—salt	300 catties.
Tai chu—benches.....	400
Pei chü—sleeping mats	200
fans	10,000

Outlay of money.

	s.	c.
To food for Nanmings, adults 20 c. infants 10 c.....	14,881	170
For boats, &c., to send Nanmings to and from Sincha ..	227	500
For boats to send Nanmings to Tangchou, Hsien nin meao, and elsewhere	2,531	600
For buying provisions, &c., for persons going away with certificates	305	500
Purchase of grain (rice) 78 tan..	263	870
Do. (beans) 12 tan, 4 ton	29	700
For erection of 30 houses	249	112
For doctor's visits and medicine	72	464
For hire of boats for removal of Nanmings	102	774
For straw, &c.	86	11
Mats, 1,790 lengths	161	85
Overseers	48	410
Flags for Nanmings	10	826
Purchase of paper, ink, &c. ..	3	700
Cash String	1	392
Conveyance of money, &c.	64	774
Total.....	19,041	876

To make up the deficiency 41 s. 813 c. are wanting. This distribution began on the 13th of 4th moon, and ended on the 2nd day of 7th moon; during which time relief was afforded to 15,907 Nanmings. No account is taken of 334 coffins which were purchased for deceased refugees at a cost of 700 s. 800 c.

To the Editor of the
NORTH-CHINA HERALD.

SIR,—Will you allow me through the columns of your Journal to acknowledge the receipt of the following donations in response to my appeal on behalf of the houseless Refugees.

W. de Normann, Mex. $10, R. J. Forrest, $5, Anonymous $5, T. Broadhest $5, R. J. Ashton $10, R Reid $20, W. R. Dalziel $5, R. Arnold $20, W. Waller $10, T. F. Ballance $10, A. Barton $10, L. G. Dunlop $5, J. A. Wheelock $10, E. Webb $50, G. H. Woodfall $5, J. Baker $5, J. Thorne $5, A. A. Hayes $5, G. Caine $5, Officers and Privates of the Royal Marines $30, J. Dow $20, Dr. Bell $10, V. P. Jordan $10, G. H. Wyndham $5, T. J. Gower $25, R. M. Olyphant $50, Colonel Walsh, Loodianah Regt. $50, A. M. Gubbay $5, Yang Ta-ke (from the fund subscribed by Foreign and Native Merchants) $170, F. P. Webb, Tls. 10, A Friend Tls. 20, H. N. Lay Tls. 25, A Thank-offering Tls. 50, A. Howell Tls. 5, H. T. Davies Tls. 15, R. Hamilton Tls. 100, R. Goddard Tls. 10, W. G. Howell Tls. 30.—Making a total of six hundred and four Mexican dollars and two hundred and sixty-five Taels, or Mex. $957.34.

Of this sum I have disbursed as follows:—

Personal distribution to Refugees at the Tien Fei Kung, Lau-chae, Poo-tung, Bubbling Well Village, &c., &c., &c.,	*Mex.* $ 363
Paid Rev. Mr. Mills, for distribution amongst the Refugees outside the South gate, ...	299
Paid Rev. J. S. Burdon, for distribution, ..	20
Paid Rev. W. Syle, for distribution amongst Refugees at Hung-keu, ...	50
Total Mex. $.....	732

Leaving still on hand for distribution a sum of Mex. $225.34. With grateful thanks to those who have given me the means and the honour of relieving much human suffering,

I am, Sir, Yours respectfully,
JOHN HOBSON.

Shanghai, Sept. 27th, 1860.

From a Chinese Correspondent.

AT Tien-tsin some little difficulty occured about getting carts for the conveyance of stores to the van. The city prefect knew nothing about any, it was quite impossible, according to him, for such things to exist in the city. So it was determined to bring a little pressure to bear on his Excellency, who was put in durance vile until such time as the carts were forthcoming. Not liking his confinement, the prefect, in a great rage, sent a request for a bottle of samshu and a knife. General Napier sent him the first of these articles in the shape of a bottle of sherry, but declined to send the knife. After a week's confinement the carts were supplied by H. E.'s orders, and that gentleman was liberated. He was loud in his thanks that the knife had been refused, saying that the English understood Taoli, and that our sherry and conduct were both excellent.

A certain mendicant friar had been obliged to leave his monastery on account of his partiality for the softer side

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.

of humanity. He arrived at Tientsin and was allowed to live in a monastery which became afterwards the abode of Generals, Colonels, and other men of scarlet. When the foreign occupation took place the proper head of the monastery was absent, and the mendicant having overcome the scruples of his fellow monks passed himself off as the Superior. He pleased the English immensely by giving them every room they required, and having no strict idea of *meum* and *tuum*, began distributing the clothing, etc., of the priests among the barbarians. He took to his liquor very kindly moreover and always retired to his couch in a greater or less degree of serenity. When the proper Superior returned our friend would not admit him, called him very improper names, and ran after him with a knife. This led to a complaint to the prefect, and the mendicant was unmasked, received several blows on the face, and was banished to the South of China for 2 years.

Hsüeh has received the first class (plain) decoration. H. E. the Taotai the second, (flowery) and Takee also the second, for the defence of this city against the countless myriads of rebels who came against it and were exterminated beneath its walls.

The Rebels are reported to have received a check before Hangchow. This news is however doubtful.

His Imperial Majesty Hsien Fêng has according to the report of his lieges in this place resolved to follow the example of the last King of the Ming dynasty and put an end to his own existence as soon as the barbarian enters his capital. He seems the idea of running away (Barbarians hint he can't.)

FROM an Advertisement which appeared in our Shipping List of 27th inst. the community of Shanghai will have learned that the Committee of the Library have abolished the Entrance Fee of ten taels, hitherto paid by fresh subscribers. Without going into common-place observations on the benefits of reading, we beg to call public attention to this fact, and doubt not it will induce many to join the Institution.

(Communicated.)

MEDITATIONES JAPONICÆ.

There is something excessively unique in the idea of Europeans being beaten in the race of civilization by a nation of Orientals; and these too, not more cut off from the rest of the world, by geographical insulation than by the exclusive system of their government. It is not to be inquired if there is anything in the Japanese character equivalent to the self-sustaining and self-progressive element of the Anglo-Saxon; but it is undeniable, that there is among the former a display of mental activity, such as the previous study of humanity among other Asiatic nations does not lead us to expect. That there is sufficient of the original about them to establish their identity is an admitted fact, while their keen appreciation of excellence in others, has led to a development of character, unparalleled in the history of nations.

Without entering largely into the details of this question, it may be partially illustrated by a few remarks on the linguistic propensities of the people, which are sufficiently conspicuous to arrest the attention of the stranger at a very limited acquaintance. This feature is the more noticeable to any one who has resided long in China, where he finds the general incapacity of the natives to acquire a foreign tongue, partially concealed under a would-be contempt for everything barbarian. In Japan, no sooner does a new nation present itself on their coasts, than enquiries are set afloat as to the whence and the why; and if the stranger is permitted to set foot on their frequently inhospitable shores, but a short time elapses ere the native authorities have furnished themselves with a medium of intercourse altogether independent of foreign interpreters. Questions innumerable beset the new comer, as to the names by which he designates such objects as may be within view, and every effort is made to learn the idiom in which he communicates his thoughts to others. From the long residence of the Dutch in that country, their language has become familiar to a large body of interpreters and others; and since the more recent occupation by the new Treaty powers, a fair progress has been made in the acquisition of English and Russian, and to a less extent, of the French also.

But besides the mere traditional acquirement of these qualifications, they have taken great care to perpetuate the knowledge, by numerous publications of a linguistic character. Japan is essentially a literary nation, and they possess not a few works on the history, the character, and the peculiarities of their own language. Native lexicons are almost innumerable, and grammatical treatises abound, which might be profitably studied by the foreign Japonologue.

Little as has been the intercourse between the Chinese and Japanese, many works have been published by the latter, and are now in common circulation, for the mutual acquirement of the two languages, while not a single book of the same character is to be found issuing from China. Vocabularies and Phrase books of the Ainos or natives of Yesso are not uncommon; and they have also publications on the language of the Coreans.

Works on the Dutch are numerous, that the enquirer finds it necessary to make a selection; and some of these are not of very recent origin. One bearing date 1783, entitled the *Ran ka tai ai*, "Ladder of Dutch Science," is much quoted by subsequent writers, being a treatise chiefly philological and grammatical, abundantly illustrated with the European character. The *Ran ka do an dai*, a Spelling book, Vocabulary, and Phrase Book of the Dutch and Japanese languages, was reprinted in 1856. An enlarged edition of the *Ran go sen* was issued in 1857. This which first appeared in 1798, is a Vocabulary and Phrase book in the Koyé Japanese and Dutch languages. During the long and compulsory residence at Desima of Governor Doeff (famous for having outwitted Sir Stamford Raffles on two occasions,) from 1804 till 1817, he employed a part of his leisure in translating Halma's *Nederduitsch en Franssch Woordenboek* into a Dutch and Japanese Dictionary, entitled *Yeko Halma*. That work is now being reprinted at Miaco, in 24 vols, as a native speculation. The *Nederduitsche Taal, or Yih keen* "Interpretis clavis," in two thick and one thin volumes, published in 1835, is a Dutch Japanese Dictionary, compiled by the natives, containing apparently the essence of the Doeff-Halma Lexicon. A very much enlarged and improved edition of this was begun in 1857, and is now passing through the press at Miaco.

Among the direct translations made by natives from European works, are the *Ban ten toku haf*, a Grammar of the Dutch language, illustrated throughout with the European character. The *Yik ko ran bun go* is another Grammar, translated and issued in 1855. From the Japanese subscription, we learn that the original was composed by Hendrik Ruyekes, at Amsterdam, in 1822.

The *San go ben ran* is a Vocabulary in the Japanese, Chinese, French, English and Dutch, with the pronunciation of the three latter given in the Katagana character. The *Yei go sen* is a reprint without alteration of the "English Japanese Vocabulary," published by the late Dr. Medhurst at Batavia. The *Ko yei tek ko tei ko* is a curious specimen of the initial attempt of an unaided Japanese to promote the lingual intercourse of his countrymen with the English. It is a small manual of dialogues in the English and Japanese languages, with an interlinear orthography in the Katagana character. Let the author explain his own intention by the following title page: "A new FAMILIAR PHRASES of the ENGLISH and JAPANESE LANGUAGES GENERAL USE for the MERCHANT of the BOTH COUNTRIES. first parts NAGASAKY, sixth year of ANSAY, December, 1859."

In 1857, a literal reprint appeared in the Japanese book form of the "Engelsche Spraakkunst," a Dutch Grammar of the English language, by Van Kesteren, Amsterdam, 1836. They also reprint European books after the European model, with Roman and Italic moveable types. Among others, we find the "Nederduitsche Spraakkunst," by Weiland, 1820; and the "Syntaxis of Woordvorgang der Nederduitsche taal," 1846.

The above are merely a few selections from the philological stores of the Japanese; and are by no means intended to represent the extent of their possessions in that respect. A moderate enquiry would doubtless discover many other productions respecting the languages above noticed, as also helps to the acquirement of the Russian, Portuguese, Spanish, Manchu, and even Tibetan and Sanscrit.

Although these works may not rank high intrinsically, when viewed in connexion with the present state of Comparative Philology; yet originating as they do with a people like the Japanese, cut off from foreign intercourse, and having few of those incentives that impel the European, these independent efforts will not suffer much by comparison with what has been done by any of the nations of the west. Since the country has been recently opened to foreign enterprise, students who have settled there from various motives, have been much hampered, in consequence of the paucity and unsatisfactory character of the helps to be obtained in acquiring the language, and this want is not likely to be very soon supplied. Next to the living teacher, it is found that the Chinese character is the surest medium by which to attain to the true genius of the language; but unfortunately this is an acquirement demanding an amount of study and time, which probably few will be disposed to bestow on a mere preliminary. It must not be lost sight of however by any one who desires ultimately to master the written language. Nothing is so great a desideratum at present as a good and complete Japanese European Dictionary. In the time of the flourishing European intercourse with Japan, between two and three centuries back, some such works must have necessarily been written, but the exceedingly few specimens now extant are kept as rarities of prodigious value. One specimen at least exists of a Latin, Portuguese, Japanese Dictionary, published by the Jesuits in Japan in 1595, with the title "Dictionarium Latino Lusitanicum et Japonicum, &c." Another, which is also rare, although a copy may be met with occasionally, is Padre Collado's "Dictionarium sive Thesauri Linguæ Japonicæ Compendium, &c." printed at Rome in 1632, with an additional part by the same author, a Portuguese "Vocabulario da Lingua Japonesa," by Marta da Sylva, is quoted by old authors, but it was probably never printed. In 1603, another was drawn up, and published by the Jesuits at Nagasaki, with the title "Vocabulario da Lingua de Japam com a declaração em Portuguez, &c." A translation of this was made into Spanish by A. Esquivel, and published at Manila in 1630, with the title "Vocabulario del Japon declarado primero en Portuguez, &c." In the preceding works the Japanese words are all given in the European character. Such are the only remaining evidences of the lexicographical labours of scholars at that early period; from which time nothing of the kind made its appearance for exactly two hundred years, when W. H. Medhurst of Batavia, who from his knowledge of the Chinese written language, was enabled to translate a native Japanese Vocabulary, published the same with the title "An English and Japanese, and Japanese and English Vocabulary, &c." This has been found of much service, in the absence of anything more complete. Five years later, the same author published a "Translation of a Comparative Vocabulary of the Chinese, Corean, and Japanese Languages." In this the three last named languages are all written in the Corean character, which renders it less available for the Japanese. There is a translation of the "Thousand Character Classic" in the same form appended. Professor Pfizmaier of Vienna appears to be the first to recent times who had conceived and carried out to any extent the idea of a complete dictionary of the Japanese. The first volume of his "Worterbuch der Japanischen Sprache" was issued in 1851, and is not likely to be followed up by any continuation. This volume which is in Japanese, German, and English, does not exhaust the first initial of the syllabary, and if continued in the same prodigal style of execution, would probably extend to 20 or more volumes. A Japanese-Russian Dictionary appeared at St. Petersburg in 1857, drawn up by J. Goehkévith, with the assistance of the Japanese Tatsiban no Koosai; and a Russian-Japanese Vocabulary was recently in progress by the same author. For some years past, Léon de Rosny has had two dictionaries advertised as in process of execution, a "Dictionnaire Japonais-Français-Anglais," and "Dictionnaire Français-Japonais," but neither of these have yet been given to the public.

With the exception of this meagre catalogue, the student can look for very little aid from anything published beyond the shores of Japan; unless indeed he can avail himself of Siebold's costly reprint of the Chinese-Japanese Dictionary, *Sin zoo zi lin gyok ben*, and the Japanese-Chinese *Wa kan won seki syo gen zi ko*, forming the first and second volumes of his magnificent "Bibliotheca Japonica." The original works may be easily procured at any of the ports of Japan.

A few vocabularies of very limited extent may be found in various books treating on Japan, but as they are all written in the European character, they are of little practical value. The principal of these is a Dutch Japanese Vocabulary, in the Transactions of the Batavian Society of Arts and Sciences, for 1787, by J. C. M. Radermacher. The work of Pallas, drawn up under the patronage of the empress Catherine II. of Russia, "Linguarum Totius Orbis Vocabularia Comparativa," has also a catalogue of Japanese words. Thunberg's "Travels," published originally in Swedish, and afterwards translated into German, English, and French, is preceded by a "Vocabulary of the Japanese Language." In Hervas' "Catalogo de las Lenguas," Krusenstern's "Worter-Sammlungen," Klaproth's "Asia Polyglotta," and some other works, special collections of a kindred character may also be found.

If the field is poor in point of Lexicography, there is little to boast of in regard to Grammars. The "Arte da lingua Japoneza" of Da Sylva, for all practical purposes, may be reckoned non-extant. The work of Emanuel Alvarez, "De Institutione Grammatica," printed in Japan in 1593, is now so rare as to be of little service to the public. This is in Latin, but it gives the conjugations of the verbs, in Latin, Japanese, and Portuguese. In 1604, the Jesuit College at Nagasaki printed the "Arte da lingoa de Japam," written in Portuguese by Rodriguez. The same Father, however, in view of the involved and cumbrous plan of this work, resolved upon a condensed treatise, embodying the essence of his more elaborate production, and better suited to the requirements of learners. This abridgment he completed at Macao in 1620, but it was never put to press. The manuscript having found its way into the Bibliothèque Impériale at Paris, the attention of orientalists was drawn towards it, and on the establishment of the Société Asiatique, it was one of the first objects of that institution to publish the results of Rodriguez's labours within the reach of the public; when a French translation having been made by C Landresse, it was published by the Society in 1825, with the title "Elémens de la Grammaire Japonaise." In the dearth of other works in this department, this has been found almost indispensable to those applying themselves to the study; but the prolix and wordy character of the treatise, leaves much to be desired for the ready comprehension of the subject. Collado's "Ars Grammaticæ Japonicæ linguæ," printed at Rome in 1632, like the preceding, fails to seize the true genius of the Japanese idiom. It was translated into Spanish, but the version remains in manuscript, as one of the treasures that enrich the library of the Franciscan College. Another Grammar in the Spanish language, by Father Oyanguren, was printed at Mexico in 1738, with the title "Arte de la lengua Japona." A copy of this now exceedingly rare work, was brought over to Europe from Mexico by A. de Humboldt; and part of it having been translated into French by Langlès, it was published in 1826, as a supplement to Rodriguez's Grammar. Father Oyanguren is a zealous opponent of the use of the native Japanese character, which we are told he characterized *as a scheme of the devil to augment the difficulties of preachers of the Gospel.* There is a short grammatical summary in the Latin language, by Thunberg, in the fifth volume of the Transactions of the Upsal Royal Scientific Society, 1792. The eleventh volume of the Transactions of the Batavia Society, 1826, contains Siebold's "Epitome linguæ Japonicæ," a short grammar, well worth the attention of beginners as a stepping-stone in the language. A number of impressions were also issued as a separate work. J. I. Donker Curtius, the late Dutch Resident at Desima, had so far embraced the occasion of his sojourn, as to compile a grammar of the Japanese in his national language. This was presented to the Dutch government, who handed it over to Dr. Hoffman to superintend the publication. The latter, however, has submitted it to so severe a criticism, and introduced such a large proportion of his own matter, that the "Proeve eener Japansche Spraakkunst" is well pass for a series of strictures on Curtius's production. Leon de Rosny, who now takes the lead in Japanese studies in France, has made two contributions to grammatical science in this department; i.e. "Résumé des premières connaissances nécessaires pour l'étude de la langue Japonaise," and "Introduction à l'étude de la langue Japonaise." In these the author shews that he has attained a remarkable knowledge of his subject, and the latter especially is a most convenient manual for a beginner. The works of Hoffman and Rosny are profusely illustrated with the Japanese character, in a beautiful form of impression. The Russian government, alive to the importance of the subject, has in hand a Russian Japanese Grammar by Goehkévith, unless it be already published.

In all this list of grammatical treatises however, we find nothing in English, the language of the two most influential and enterprizing nations, which have acquired recent privileges in the kingdom. Unless it be two articles on the grammar of the Japanese language by Gutzlaff and S. W. Williams, in the 6th and 10th volumes of the Chinese Repository, and some remarks on the Aino dialect, in Siebold's "Mariner's Guide to Japan," recently translated from the Dutch, there is absolutely nothing on the subject in our own idiom. Leggins' "Familiar Phrases in English and Romanized Japanese," although a most valuable aid to a visitor, can scarcely be styled a grammatical work. It is true, we hear there is a Grammar in progress from the pen of the Resident British Minister at Yedo, and it no doubt augurs well for the future cultivation of the study, to find one so influential by position, and well qualified by philological attainments, turning his attention in that direction. His grammar will be welcome as the first in the field; but it will doubtless be speedily followed by other treatises. The number of students is increasing, and the want becomes pressing; but it is an ungrateful task, and one requiring much self-sacrifice, to work for the public in this unrequiting sphere. Very little encouragement has been afforded hitherto by the British government towards efforts of the kind, and unless Her Majesty's subjects can find other incentives, we may look in vain for a more elevated state of the science among them.

While speaking on this subject, it may be well to draw attention to the fact of the existence in Shanghae of a Branch of the Royal Asiatic Society. Surely it would not be beyond the legitimate sphere of that body to give an impetus to such efforts. Without pretending to dictate in this matter, the practicability of such a scheme may be suggested. Competition has done much in other quarters; might it not be applied here? The offer of a prize might call forth much latent talent, which would repay a hundredfold the pecuniary outlay. An addition to the Library of the Society of all the principal works on Japan, especially philological, would give it an individuality and a status, and render it a resort for the student. It might be greatly enriched also, at a moderate expense, by a large contribution of choice native Japanese works. Many of these written in the Chinese character, would be accessible at once to the Chinese scholar, and the desire to read those in the Katagana and Hiragana might induce some to direct their attention to the subject. Books in the Hiragana character have been scarcely looked into yet by the Europeans; but it is almost certain that there is abundance of matter in the native writings, amply to repay those who shall first penetrate the mystery. It can scarcely be otherwise. The Journal of the Society might be made the receptacle of literary contributions from the same source, which would prove subjects of great interest in the west. A periodical review by the Society of the state of literature both current and stagnant in Eastern Asia would also have a beneficial effect, and be quite in harmony with the proceedings of similar societies in other parts of the world.

Among the aids to learners, perhaps translations from original Japanese works ought not to be omitted. The *San kok tsoo ren to seta*, is a descriptive account of Coren, Lewchew, and the Bonin Islands, translated by Klaproth into French. The *Fookowa strink*, is a "Treatise on the origin of the riches of Japan," translated by the same, also in French; but the originals of both these, although written by Japanese and published in Japan, are in the Chinese character and idiom. The *Ko ko ro ki dai ran*, or "Annals of the Emperors of Japan," translated originally by Titsingh, with the aid of a Japanese interpreter, has been edited and published in French, with copious and valuable notes, &c., by Klaproth. The original of this work is in the native Japanese idiom, written in the Katagana and Chinese characters. A Japanese romance, written entirely in the native Japanese character, has been efficiently reprinted, with a German translation by Pfizmaier, under the title "Sechs Wandschirme in gestalten der verganglichen Welt," or "Forms of the passing world, in six folding screens." The only production of the kind we have in the English language, is a translation of the *Ko dou dzu robu*, "A Memoir on Smelting Copper," by S. W. Williams, in the 9th volume of the Chinese Repository.

The fact is incontrovertible then, that as English (including of course Americans), we are more imperfectly furnished with the means of acquiring the Japanese language than several other European nations. Shall such a state of matters continue? Are the interests at stake too unimportant, or the motives insufficient to excite to emulation? On the contrary, the Merchant, the Official, the Missionary, and the Man of Science, would each and all derive their quota of advantage from the more extensive cultivation of a knowledge of the written language of Japan. It is true the spoken medium of Japan is infinitely easier than that of China, and that residents at the ports are able within a short period to communicate with the natives in a *lingua franca* dialect of that language, approaching in analogy to the Pigeon English of Canton. But to make this the terminus is scarcely becoming the dignity of a nation which is sometimes inclined to look down upon all Ultra-Gangetic peoples as scarcely beyond the confines of barbarism.

WE extract the following from the *Straits Times* of the 8th September.

NEW ZEALAND.—We have received intelligence from New Zealand and the Australian Colonies, up to the end of July. The news is most gloomy. The war in New Zealand had assumed larger proportions, and a sanguinary and bloody engagement had taken place at Taranaki between the British troops and the Native Maories, which had resulted in the signal defeat of the former. The following are the particulars of the battle, as reported in the Melbourne journals:—

"Desperate fight at Waitara. Twenty-nine British killed and thirty-two wounded. Defeat and flight of the British.

TARANAKI, *June 26.*

A foraging party of soldiers at no great way from the camp were fired upon by a large number of natives. The soldiers, about 30, retired towards the camp, followed by the natives, who ventured within shelling range of the guns, and were received by a couple of shells, which burst among them, and which are said to have done execution.

Major Nelson prepared upon this to attack the natives, and two 24 lb. howitzers were sent by the Tasmanian Maid, with ammunition. Reinforcements, consisting of all the men of the 40th Regiment, not before in camp, and 60 of the Naval Brigade (under Capt. Seymour), proceeded to Waitara by a road, passing at Bell Block till nightfall.

About daybreak yesterday a force of 200 men from the 40th and the Naval Brigade set out from camp with big guns, and took up a position to the right of the pa next the sea beach. They had with them Major Nelson, Capt. Richards of the 40th, Capt. Seymour and first Lieut. Battiscombe of the Pelorus, and Lieut. McNaughten of the Artillery. Another party of 150 men, sent round between the pa and river, leaving a detachment in the flat, came in rear of the enemy on the inland side. The pa was thus surrounded, so that none coming out could escape from one force or another.

A distressing fire was maintained from a broad ditch, and orders given to fix bayonets and charge. The natives, lying down with loaded guns, started up when the line was within a few yards, and poured in a murderous volley with double barrel guns, which fairly shook the adjacent ground as a sensible visitor, gave a hand-to-hand fight followed, in which many fell. One of the 40th, it is said, bayonetted six of the enemy, and was then shot down. Some white scoundrel was among the enemy, directing them.

The Grenadier Company lost 33 men, killed and wounded, chiefly in the struggle. The whole loss on our side was, as far as could be ascertained, as follows:—Killed, 40th, 46; Naval Brigade, 10; Artillery, 5; total 61. Of these 29 were killed and 32 wounded. Among the killed was Lieut. Brooke, who sold his life dearly, and fell only when his sword-arm was helplessly wounded. Capt. Seymour of the Pelorus, is among the wounded.

The enemy showed unexpected resolution, being the first body of men able to meet the British bayonet.

This sanguinary fight would have caused the annihilation of the native force at Waitara had more troops been present.

The subjoined additional telegram contains a few further particulars:

MELBOURNE, *July* 11.

A New Zealand steamer, arrived at Sydney, reports a great battle at Waitara. 25 English killed and 32 wounded. Lieut. Brooke was killed, and Capt. Seymour (of the Pelorus) wounded.

The natives fought with great bravery and skill. The English retreated, leaving their dead on the field.

Colonel Gould was within a short distance of the forces engaged with the enemy; but he neglected to give assistance, marching back the whole of the troops under his command without striking a blow.

Major Nelson's men, numbering 350, fought gallantly; but Col. Gould sounded a retreat at 3 o'clock in the afternoon without communicating with Major Nelson. Intense disgust and dissatisfaction are expressed at Gould's brutal conduct.

The Sydney and Melbourne papers are filled with details of this great calamity, and it forms the engrossing topic of conversation among all classes. The first pitched battle, which had been looked forward to as the event which would certainly put an end to the rebellion has been fought, and the result, we grieve to say, is to the British power disastrous in the extreme. There were 300 British troops, opposed to 1000 of the enemy. The latter are now said to be equal to the English in courage and in the art of war, and are considered worthy enemies, man for man. They are the first warriors on earth who have been able to stand a charge from British bayonets.

Large reinforcements were sent forward from Melbourne, immediately on receipt of intelligence of the disaster.

To the Editor of the
NORTH-CHINA HERALD.

MR. EDITOR,—There is a tide, we are told, in the affairs of men, which, taken at its full, leads on to glory. This is as applicable to the body politic as to men individually. In truth, the person who has gained the enviable notoriety of being a "lucky fellow," is simply one who, "wiser in his generation than the children of light," has had the cool judgment and happy determination to take this tide at its full.

Having pitched my tent in Shanghai in the true spirit of a cosmopolite, ties have sprung up around me, which I am neither able to control nor desire to ignore, and hence the train of thought into which I have tumbled.

Such a tide, I believe, is now flowing in our settlement, and upon our prompt action will depend the fulness of the measure of our success. In saying this, I should more particularly refer, amongst other matters of grave import, to the opportunities that have so unexpectedly presented themselves in the direction of road making.

I propose to enter upon no elaborate enunciation of the benefits to be derived from the old Westminster pentameter,

Mac-adamizando constabilare vias.

Upon that point, I presume, we are all agreed.

The Municipal Council are behind, and I believe prepared to open up and keep open new roads *within* the settlement, and this, it would seem, is now more especially necessary, when we find that within a very few years, the Chinese in this settlement have, in certain localities, been steadily and rapidly covering the ground with tenements of a poor and very questionable description. The panacea for this crying evil is not very apparent, but the Council need not be reminded that broad and straight roads are a very material help to police operations, and, if we can credit the rumoured reconstruction of this defective but important branch of the Civil Service, the community will benefit to its fullest extent by a little energy in this direction. The means at the disposal of the Council are limited, and they can do no more than take the initiative in the matter of extra-mural paths. It is to the liberality of the public at large that we must look for the "sinews of war" to establish *these*. If the settlement is to be successfully defended against the incursions of the Rebels, artillery must be introduced, and as a consequence roads must be made.

We have amongst us, at the present moment, an officer of high rank, who not merely evinces the desire, but possesses the ability to carry out this great work. An offer, I believe, has been made, not only to supply the skilled labour for the purpose, but to supervise and direct the coolie labour required. Brigadier JEPTHSON it is rumoured will undertake the scientific part, for which he is so peculiarly qualified, if the inhabitants of Shanghai will furnish the "thews of wood and drawers of water" to carry out his plans.

Surely "Daphne roaming through a thorny wood" was not more to be pitied than is an "outer Barbarian," in a struggle for health after a rainy day, in the suburbs of Shanghai, and I feel confident that an appeal to the residents here will not be made in vain, upon a matter that bears so directly on the security, the comfort, and the convenience of every member of our society.

I am, Sir, your obedient Servant,
CARPE DIEM.

Shanghai, 21st Sept

ARRIVAL OF THE MAIL.

THE private steamer *Yang-tsze* arrrived on the 26th instant, bringing part of the English Mail of 10th August, and followed by the P. & O. steamer *Formosa*, on the 20th with the remainder.

The most interesting item from Europe is the publication of a rather extraordinary letter from the Emperor of the French to his Ambassador, Count Persigny, in which he seems more than usually anxious to obtain the good opinion of England.

There have been several important questions in Parliament, but the Government have had great triumphs. The estimate for the Chinese war and the fortification scheme, have been passed; and after a severe opposition, the Government have carried the reduction of the Custom Duties on Foreign Papers.

MONEY MARKET.—Quiet.

BULLION.—Per *Ripon*, from Southampton, on 4th August, 1860,—

For Hongkong, ...£43,130.
For Shanghai, ...£13,833.

Consols, 93 a 93¾ for money, 93¾ a 93¾ for account.

Rate of Discount,—Bank of England, minimum 4 per cent, in the market.

Bar Silver, 5s. 1½d. per oz. Standard.
Mexican Dollars, 5s. 2¼d. per oz.
Coin and Bullion in the Bank of England, in both Departments £15,758,880.

TEA.—Very quiet. Common Congou, 1s. 2½d. a 1s. 3½d.

Silk—Tsaileo, 21s. 0d. a 23s. 0d.; Taysaams, 17s. 0d. a 19s. 0d.; Chinese Thrown, 17s. 0d. a 21s. 0d.; Japan do., 18s. a 20s.

SHIPPING INTELLIGENCE.

(Since our last Report.)

ARRIVED—From Shanghai, July 23rd at Calao, *Oscar*; Aug. 4th at Deal, *Kawchamcha IV.*; at New York, *Beaver, Red Gauntlet.*

DEPARTED—For Shanghai, Aug. 1st from London, *Japan*; for Cardiff and Shanghai, Aug. 4th, from London, *Anna Maria*; 8th, from Cardiff, *Adalatar*. From New York, July 13th, *Tsar.*

LOADING—For Shanghai, at London, *George Washington* and *Harkaway*. At Liverpool, *Victor Emmanuel, Biobio, Potosi, George West*, and *Benares.*

PASSED ANJER.—From Shanghai, Aug. 27th, *Jubilee*, for London. From Liverpool, Aug. 19th, *Queen of the Seas*; 20th, *Weymouth*. From Cardiff, Aug. 20th, *Africa*. From New York, Aug. 21st, *Horatio.*

To be continued monthly.

ADVERTISEMENTS.

FAMILIAR PHRASES IN ENGLISH & ROMANIZED JAPANESE. By The Revd. J. Liggins. *Price—5 mace.* *London Mission & North-China Herald Office.* April 14th, 1860.

TIME TABLE.

Showing the proposed movements of the Mail Steamers between England and Shanghai, approved by the Lords Commissioners of the Admiralty. Corrected for 1860. *North-China Herald Office,* April 16th, 1860.

FOR SALE.

A few Copies of the Correspondence with The Honorable F. W. A. Bruce, C.B., Her Majesty's Envoy Extraordinary and Minister Plenipotentiary in China, relating to the affair at Taku in June 1859,—published in the *London Gazette* and reprinted in the *North-China Herald* —may be had in Pamphlet form at this Office. tf Shanghai, 19th January, 1860.

JAPAN.

(From the Chinese Repository, 1834-1851.) Its geographical situation and extent;—Government, laws, manners, customs and literature;—Intercourse with Foreign nations;—Origin of the Japanese, their early history and national character, &c., &c., &c. *Price—5 mace.* *North-China Herald* Office, Shanghai, 17th May, 1859.

NOTICE.

The *LADY'S NEWSPAPER & PICTORIAL TIMES*, is the best Illustrated Weekly Journal for Ladies, being especially devoted to their interests, instruction, and amusement. It contains each week, besides the usual Illustrations of the Events of the Day, the Latest Paris Fashions and the Newest Work-table Patterns (working size); and is therefore particularly valuable to Ladies, and Families out of town, and quite invaluable in the Colonies. Annual Subscription (paid in advance), £1. 6s., either stamped or post-paid to any British Colony. May be ordered at the Office, 83, Fleet Street, London, or through any respectable news agent

ELEY'S AMMUNITION

Comprises every description of Sporting and Military Ammunition.

Double Waterproof Central Fire Percussion Caps, as originally invented by them, are particularly adapted for use in India, where the caps are often allowed to remain a long time on the nipples of rifles and fowling-pieces, the ignition being at all times safe and certain, whilst in humid weather the discharge is as instantaneous as with ordinary caps on the driest day. For testimonials as to their value for shooting in India, *See Col. Jacob's work on "Rifles & Projectiles."*

Patent Wire Cartridges

For killing game at long distances; also the Green Cartridges, made with the largest drop shot and mould shot, will be found very effective at large game, where the sportsman has not a rifle in the field.

Also, chemically prepared Cloth and Felt Gun-Waddings, to prevent the leading of guns. Cartridges Cases for breech-loading shot guns, and Ball Cartridges for Prince's and other breech-loading Rifles, Muskets, Pistols, &c.

ELEY BROTHERS,
Sole Contractors to the War Department.

For Waterproof Military Caps, Cartridges and Caps for Colt's, Adams', and other Revolvers, Jacob's Rifle Shell Tubes, &c.
Gray's Inn Road, London, (wholesale only).

FREDERICK J. SMITH & CO.
54 Clement Street, Birmingham, England.

Manufacturers and Export Ironmongers—Supply at Manufacturers prices every description of Ironmongery, Bedsteads, Earthenware, Glassware, Cutlery, Boots and Shoes, Plated and Papier Mâché Goods, Watches, Jewellery, &c.

ALGAR & STREET,
Colonial Newspaper & Commission Agents.
THE COLONIAL PRESS
SUPPLIED WITH
NEWSPAPERS, BOOKS, TYPE, INK, PRESSES, CORRESPONDENT'S LETTERS,
And any EUROPEAN GOODS, on London Terms.

Colonial Newspapers received at this Office are regularly filed for the inspection of Advertisers and the Public.
11, Clement's Lane, Lombard Street, London.

APPETITE AND DIGESTION IMPROVED

Lea & Perrins' celebrated Worcestershire Sauce imparts the most exquisite relish to every variety of Dish, and, by its tonic and invigorating properties, enables the Stomach to perfectly digest the food. The habitual use of this Sauce has been found most conducive to health.
Sold by the principal dealers in Sauces universally. Wholesale and for exportation by the Proprietors, Lea & Perrins, 68, Broad Street, Worcester, and 19, Fenchurch Street, London, Also by Crosse & Blackwell, and other Oilmen and Merchants, London
